Employment

Salesforce Developer & Consultant

Coredet | Nov. 2021 - Present

- Created responsive and highly accessible components for UI designs.
- Leveraged FormTitan to create a fully integrated webform with Salesforce that can trigger flows and create/update records.
- Partake in several projects for various clients.

Salesforce Developer

Vestel | June 2021 – Present

- My work on Vestel Asist had a significant impact on the overall success of the project. By creating highly functional and tailored components, I was able to streamline the process of planning and executing visits for users, reducing the time required for them to complete their tasks and improving their overall experience with the platform.
- The poll component that I designed also helped to gather important data from users, allowing the platform to continuously improve and meet the needs of different audiences.

Salesforce Developer

CCI Coca Cola | June 2021 – Jan 2023

- Overall, my work on CCI Cokeport had a significant impact on the platform's usability, efficiency, and overall success.
- By developing highly accessible components and optimizing its performance, I ensured that the platform met the needs of its end-users and provided them with a seamless and efficient experience.

Salesforce Developer

Sunexpress | December 2021 – Present

- My work on the Sunexpress Webform had a significant impact on the overall success of the project. By streamlining the process of submitting and resolving requests, I was able to reduce the time required for users to complete their tasks and improve their overall experience with the platform.
- The automation and integration features that I implemented also helped to make the platform more efficient, reducing the workload for administrators and improving the accuracy of data.

Education

- Dokuz Eylül University, BA in American Culture and Literature with Magna Cum Laude GPA: 3.36/4.0 (Fall 2017 – Fall 2021)
- Anadolu University, AAS in Web Design and Coding (Sep 2021 – Present)

Technical Experience

Projects

- **Vestel Asist (2012 - Present):** Created a range of components for a location-based platform, including a map feature for users to view visits, a planning component for routes and visits, a kanban feature, and a visit report page for easy route editing. Designed a poll component for filling in data on visits, tailored to different audiences and profiles.
- **EOYUNCUM (2021):** Developed a gaming platform that allows gamers to sell hourly or per game wins and create communities. Utilized SignalR on C# to enable live chat interaction and developed the angular frontend from scratch.
- **Sunexpress Webform (2011 – Present):** Developed a webform that allows users to create fully automated compensation and lost content requests that are sent directly for approval. Implemented the functionality for viewing and updating old cases.
- **CCI Cokeport (2012 – 2023):** Implemented the design created by the design team for the Salesforce platform, using highly accessible components with full responsiveness. Fine-tuned detailed animations with CSS, utilizing JavaScript and jQuery to meet their needs.

Languages and Technologies

- C#, Apex, CSS, JavaScript, HTML, jQuery, Lightning Framework, Aura Framework, Node.js, React, Angular
- Visual Studio, Microsoft SQL Server, Eclipse, XCode, Flow Builder, Experience Builder, Visualforce Pages

Leadership Experience

- Worked as a freelance developer and provided guidance to junior developers on the Eoyuncum platform.
